FIG. 13

FIG. 14 is a perspective view of a system 300 for monitoring a person's movement in a room. The system 300 includes a camera 310, a processor 312, and a display 316. The camera 310 is positioned to capture a video feed of the room. The processor 312 is connected to the camera 310 and the display 316. The display 316 shows a video feed of the room, which is processed by the processor 312 to detect and track the movement of a person in the room. The system 300 is designed to provide real-time monitoring and tracking of a person's movement in a room.
